

# Integra Products – GBP Price List

## Integra4Notes

Integra4Notes® consists of 2 components: the **Integra4Notes Designer Edition**, which allows the user to define and set up report/export definitions, and **Integra4Notes End-User Edition**, which allows users to run reports already created using the Integra4Notes Designer Edition. Both components are priced per user and allow for reporting within a single Notes organisation across multiple servers and workstations.

## Integra Quick Reports

Integra Quick Reports® is priced per user and allows end-users to create ad-hoc reports to Microsoft Excel®, as well as mail merges and labels to Microsoft Word® from within any Lotus Notes databases within the Notes organization of the user. The product allows the end-user to create, save and execute Integra Quick Reports.

Product	No. of Users
