

## Integra Products – GBP Price List

### Integra4Notes

Integra4Notes® consists of 2 components: the **Integra4Notes Designer Edition**, which allows the user to define, set up and run advanced reports, and **Integra4Notes End-User Edition**, which allows users to launch reports created using the Integra4Notes Designer Edition. Both components are priced per user and allow for reporting within an entire Lotus Notes® domain across multiple servers.

One can purchase the Integra4Notes End-User Edition without the Integra4Notes Designer Edition, and execute predefined reports defined by a business partner and/or software vendor. The minimum amount of licenses for the End-User Edition is for 50 users. One cannot purchase a Designer Edition without an End-User Edition. One cannot purchase more Designer Editions than one has End-User Editions.

### Integra Quick Reports

Integra Quick Reports® is priced per user and allows end-users to create ad-hoc reports to Microsoft Excel®, as well as mail merges and labels to Microsoft Word® from within any Lotus Notes databases within the Notes organization of the user. The product allows the end-user to create, save and execute Integra Quick Reports.

Product	No. of Users											
	1	3	5	50	100	250	500	1,000	2,500	5,000	10,000	More Users
