

Integra Products – US\$ Price List

Integra4Notes

Integra4Notes® consists of 2 components: the **Integra4Notes Designer Edition**, which allows the user to define, set up and run advanced reports, and **Integra4Notes End-User Edition**, which allows users to launch reports created using the Integra4Notes Designer Edition. Both components are priced per user and allow for reporting within an entire Lotus Notes® domain across multiple servers.

Integra Quick Reports

Integra Quick Reports® is priced per user and allows end-users to create ad-hoc reports to Microsoft Excel®, as well as mail merges and labels to Microsoft Word® from within any Lotus Notes databases within the Notes organization of the user. The product allows the end-user to create, save and execute Integra Quick Reports.

Integra Quick Reports Symphony Edition

Integra Quick Reports® Symphony Edition is priced per user and allows end-users to create ad-hoc reports to IBM Lotus Symphony Spreadsheet®, as well as mail merges to IBM Lotus Symphony Document® from within any Lotus Notes databases within the Notes organisation of the user. The product allows the end-user to create, save and execute Integra Quick Reports.
